MADE IN ITALY*

*TRULY

"Made in Italy" is not only an advertising slogan or a brand to put on a product, maybe with an Italian flag on it, to make everything seem really Italian. Today, any producer who wants to copy the quality and the prestige of the Italian character, uses these means.

Stile deals with actual facts, history and experience, local women and men who have been working with passion for generations and give the added value to the product. Stile products are impossible to copy and above all disguise with graphic designs or other tricks.

Here there are no tricks, but only reality.

The reality that we always invite everybody to touch with their own hands in our Company, in order to realise that manufacturing a wood floor is a complex mix of experience, knowlEdge:, technology and love for what we do.

It is maybe the fact that living in a wonderful land, like Umbria, makes us particularly sensitive to the beauty and simplicity of natural things. The care for details makes the difference and above all the ability to make continuous innovations creates an absolutely unique bond between tradition and improvement.

Welcome to our world. Authentic by nature.
